## KEY HIGHLIGHTS

### 2020

- June 1, 2020 – UPS marked World Environment Day by matching the carbon offsets of all packages shipped via its carbon neutral program during the month of June. UPS's carbon neutral program began in 2010 and has offset more than 60 million packages annually for customers, equal to more than 100,000 metric tonnes of carbon offset each year.

### 2019

- Nov 13, 2019 – UPS announced a series of service enhancements that will benefit up to 1.4 million postal codes across 41 countries and territories in the Asia Pacific region, opening opportunities for businesses to develop more resilient supply chain strategies as they look within the region for growth. The enhancements include day-definite guarantee with one day faster transit time for UPS Worldwide Expedited service within Asia, improved geographic reach of UPS Worldwide Express® services, reduced transit time by one day for various Asian markets and expansion of UPS Marketplace Shipping to 10 additional markets including Australia.
- Aug 1, 2019 — UPS released the findings of its 2019 UPS Pulse of the Online Shopper study™ study which tracks the online buying habits and expectations of consumers across Australia and the Asia Pacific, Europe, and the Americas. The 2019 Asia Pacific study featured, for the first time, the buying habits of business purchasers.
- Jul 17, 2019 — UPS released the 2019 UPS industrial Buying Dynamics Asia Pacific Study, which highlighted UPS's strategic insights into the industrial manufacturing segment. This study allows large

multinational companies or local SMEs to better understand the purchasing habits of B2B buyers in the Asia-Pacific region, providing insights for improving service quality both online and offline.

- Jul 9, 2019 — UPS completed the following as part of its strategy to bolster economic development in Asia:
  - **Shenzhen Asia Pacific Air Hub upgrades** increased the hub's processing capacity by nearly 50 percent in preparation for volume gains in the coming three years. These enhancements improve both reliability and quality of service provided to UPS customers in Asia. The hub owns houses separate sorting and handling facilities for express and cargo shipments, on-site customs office and processing – including China Inspection and Quarantine (CIQ) clearance for import commodities – and a dedicated 150,000 square metre ramp with 13 aircraft parking positions. Self-operated aircraft ground-handling provides UPS, as a logistics integrator, with greater control over the 86 weekly UPS flights in and out from the hub.
  - **Improved the geographic reach of UPS Worldwide Express® services**, offering international shipping with time-definite deliveries in Australia, Hong Kong, Japan, Singapore, and South Korea.
  - **Extended pick-up times by up to five hours** for export shipments from Japan, Taiwan, and South Korea, widening production windows and giving businesses additional time to fulfil customer orders.
  - **Strengthened supply chain flexibility** with Saturday pick-up services in the U.S. enabling import shipments destined for eight markets in Asia to be delivered 1 day earlier than before.
