

USA

PATH TO RECOVERY

Both women- and men-led SMBs in the USA have been recovering steadily from the COVID downturn. For example, by 2022, 75 percent of women-led firms registered positive revenue growth, up from 60 percent in 2020 (figure 1).

% of SMEs with positive revenue growth in 2020-23, by gender of CEO (figure 1)

E-commerce Trends and Challenges

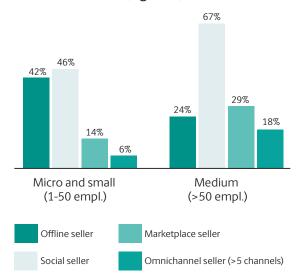

Primary e-commerce challenges in 2023

As many as 14 percent of micro and small enterprises in the USA used some type of marketplace to sell their goods and services. 6 percent of micro and small firms, and 18 percent of medium firms were omnichannel sellers (figure 2).

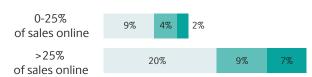

Is e-commerce a priority?

In turn, e-commerce is enabling American SMBs to engage in trade and access new markets: 36 percent of firms that use e-commerce intensively diversified their export markets in 2021-22 (figure 3). By 2022, 8 percent of micro and small businesses and 31 percent of medium businesses exported to three or more markets, up from 7 percent and 27 percent in 2020 (figure 4).

% of SMBs that diversified export markets in 2022 from 2020, by online sales intensity (figure 3)

Number of export markets in 2020 and 2022, by firm size (figure 4)

Challenges for SMBs

Quality of warehousing continues to be a challenge for American firms toward growth through trade and e-commerce. About one third of the surveyed SMB exporters cited quality of internet connection and international logistics, cost of domestic logistics, and managing their own online store as "extremely important barriers" (figure 5).

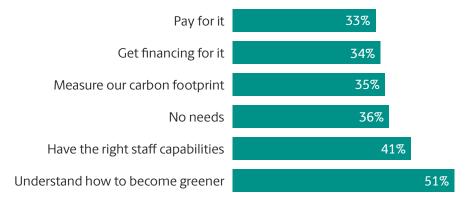

SMBs need to become more sustainable.

To make their green transition, SMBs call for a better understanding of the ways in which they can become greener and access to the right staff capabilities to make their operations greener (figure 6).

SMBs needs to become more sustainable (figure 6)

Policy Recommendations

Resiliency: To ensure SMB resiliency, governments should focus on reducing trade costs through simplification of trade processes, trade liberalization, and improvements in logistics quality.

E-commerce and Trade: To encourage SMB exports through e-commerce, ensure quality internet connections and capacity-building to grow presence on global online marketplaces, and digitized trade processes to streamline online seller-SMBs to export

Gender: To support the continued growth of women-led SMBs, promote women's access to digital technologies, financing, and new export markets.

Sustainability: Support SMBs with their green transition through awareness-building on optimal methodologies to green their businesses, measurement of their carbon footprint, and financing.
