

UPS Statement on Deforestation

UPS is committed to operating in a sustainable manner and encourages sustainable tire production methods. UPS is strongly against illegal deforestation and urges the development of alternative sources of rubber supply in order to eliminate the detrimental impact of deforestation. Our preference is to work with suppliers that commit to use zero-deforestation natural rubber and that monitor sources to ensure compliance.

Preserving the world's forests is critical to reducing carbon, combating climate change and protecting the planet's atmosphere. Through its Global Forestry Initiative, UPS has committed to plant 50 million trees by the end of 2030.
